Malappuram, Kerala, India | 9037192107 | haneenahanu002@gmail.com

SUMMARY

BCA graduate from Calicut University with hands-on web development project experience and active training in the MERN stack. Proficient in HTML5, CSS3, and JavaScript (ES6+); currently building production-grade skills in MongoDB, Express.js, React.js, and Node.js. Seeking an entry-level Full Stack Developer role to contribute to modern, responsive web applications while strengthening expertise across the modern JavaScript ecosystem.

TECHNICAL SKILLS

- Web Technologies: HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, RESTful APIs, JSON
- Frontend: React.js (in training), DOM Manipulation, Cross-Browser Compatibility
- Backend: Node.js (in training), Express.js (in training), Django
- Databases: MongoDB (in training), MySQL (basic)
- Version Control & Tools: Git, GitHub, Visual Studio Code, npm

PROJECTS

Civic Eye — Local Area Complaint Management System

Personal / Academic Project | Jun 2025 – Dec 2025

- Built a Django-based web application that enables citizens to submit civic complaints with text descriptions and image attachments.
- Developed an admin panel to track, review, and update the status of submitted complaints through a structured workflow.
- Designed role-based views separating citizen-facing submission pages from administrator moderation screens.
- Streamlined communication between citizens and local authorities by centralising issue reporting and resolution.

EDUCATION

Bachelor of Computer Applications (BCA)

Calicut University, Manjeri, Kerala | Jun 2023 – Mar 2026

CERTIFICATIONS

MERN Full Stack Development with Next.js

Luminar Technolab | Jun 2026 – Present

ACHIEVEMENTS

- Selected for a structured MERN Full Stack training program at Luminar Technolab to deepen full-stack development skills.
- Independently designed, developed, and delivered an end-to-end civic complaint management web application during BCA studies.
